

THE FALCO HORNE 5 PROJECT

A WORLD-CLASS DEPOSIT SERVING THE COMMUNITY

Falco Horne 5 is an underground gold-rich polymetallic mining project located in Rouyn-Noranda.

THE VISION OF A SEASONED TEAM

With a track record of solid experience in the mining sector, the Falco Resources team is proud of its Quebec roots and strives to achieve a harmonious integration of the Horne 5 project into its environment and community.

THE MINING PROJECT OF A GENERATION

For the Falco team, this project represents a generational opportunity to create value for all stakeholders and to contribute to the development of Rouyn-Noranda and the entire Abitibi-Témiscamingue region.

“Falco’s intention is not only to build a mine, but to build it with the community and for the community.”

Luc Lessard, Eng. President, Chief Executive Officer and Director

KEY COMPONENTS

- An **underground mine** under the former Horne mine
- A **mining complex** on the site of the former Quemont mine
- A **tailings facility** at the former Norbec mine site
- A **conduit network** between the complex and the tailings facility

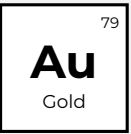

Key components will be developed on already impacted sites, which will be rehabilitated at the end of mining activities.

A FAVOURABLE CONTEXT

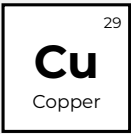

- Copper and zinc are critical and strategic minerals (CSMs) essential to the energy transition and to meet decarbonization objectives.
- Local workforce and suppliers are skilled and world-renowned.
- Existing infrastructure can be used to optimize resources, and already impacted sites can be used to minimize footprint and restore environmental liabilities.
- Transporting the copper concentrate to the nearby Horne smelter results in low GHG emissions.

Horne 5 will be the #1 copper producer in Quebec.

Over its 15-year life of mine, Falco Horne 5 will produce:

3,3 M oz

247 M lbs

27, 3 M oz

1 190 M lbs

INNOVATION AS A DRIVER OF CHANGE

- Operations redefining the industry's best practices and incorporating the latest technological advances in digitization, automation and control.
- A showcase for the development and application of innovative projects and other research and collaborative projects with the community with regard to technologies as much as social acceptability and cohesion.

THE ENVIRONMENT AT THE HEART OF EVERY DECISION

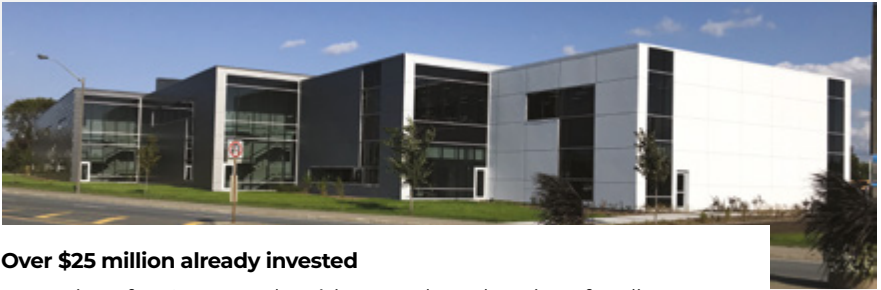

- Systematic application of the Avoid - Reduce - Compensate approach
- Integration of best practices and innovative measures to surpass them
- Impact reduction by prioritizing the use of already impacted sites
- Robust design and innovative precautions to protect air and water quality
- Nuisance reduction and performance control, especially for noise and vibration
- Adaptation of activities and compensation projects to protect and support biodiversity
- Reuse of existing infrastructure and rehabilitation of impacted sites

“Any activity has an impact on the environment, finding solutions to minimize it is always on our mind.”

Hélène Cartier, Eng. LL. B., ASC, Vice-president, Environment, Sustainable Development and Community Relations

MORE THAN ONE BILLION DOLLARS OF INVESTMENT

- A catalyst for innovation and socio-economic development that will consolidate Abitibi-Témiscamingue's mining expertise and social fabric
- Business opportunities contributing to the dynamism and diversity of the local economy
- Already tangible benefits for Rouyn-Noranda

Over \$25 million already invested

Expansion of La Source-Polymétier complex, relocation of Ateliers Manutex and construction of St-Luc multisport fields

PROXIMITY THAT PROMOTES QUALITY OF LIFE

- 500 jobs just a few steps away from home
- By car, bicycle or snowmobile, less travel time and more time with family and friends!

COMMITMENTS TO COMMUNITIES

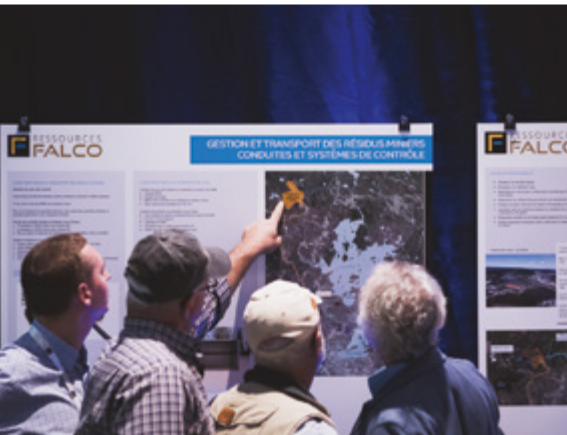

- Minimize the project's social and environmental impact
- Support quality of life and social cohesion
- Maintain transparent communications and interactions
- Promote training, diversity and inclusion for employment access
- Take labour and housing shortages into account in project implementation
- Remain mindful of the issues already present within the community
- Ensure a successful social transition once the mining operations have ended
- Maximize local social and economic benefits

First Nations

Falco recognizes the importance of First Nations and is committed to continue meaningful discussions and consultations with the communities affected by its activities and to ensure that First Nations have equitable access to jobs, all with the goal of reconciliation.

The Falco team in Rouyn-Noranda

Falco will attend Rouyn-Noranda's summer public events. Stay tuned on social media!

COME HAVE A CHAT

For information, questions, suggestions, and comments:

Espace Falco
157, avenue Principale,
Rouyn-Noranda

Monday to Friday,
from 11 a.m. to 4 p.m.

COMMUNITY INVOLVEMENT

Over 95 consultation and information meetings held since 2014, with many more to come!
